

HAI × TastyCo Early Backers Round

Exclusive participation through HAI

About the round

 HAI is the core token of Hacken Group. It powers a multi-chain ecosystem spanning DeFi, community research, intelligence, education, and early-stage access: connecting security, knowledge, and capital through a DYOR-aligned community. Through HAI utilities, holders can access real-yield opportunities, private Web3 rounds, research incentives, and broader participation across the Hacken Group ecosystem.	 TastyCo is an RWA exchange built for the global food industry. It brings operating food brands on-chain by turning them into liquid digital assets connected to real-world operations, infrastructure, and revenue streams. The platform gives food businesses from restaurant chains and agricultural producers to consumer brands – a new way to raise capital or launch product lines backed by active operations rather than roadmap promises.
--	---

Through the HAI × TastyCo Early Backers Round, both communities can access the TastyCo round exclusively through HAI.

Round conditions

Entry asset	Asset received	Fixed HAI price for this round
HAI on VeChain	TASTY on BNB Chain	\$0.002
Minimum participation	Soft cap	Early Backers allocation
12,500 HAI	2,500,000 HAI	6% of the total TASTY supply
Expected TGE	stHAI bonus	HAI burn
Q1 2027, according to the TastyCo roadmap	15% additional TASTY	100% of the HAI contributed through the round will be burned

- TASTY price, TGE unlock, cliff, and vesting depend on the selected participation option.
- The burn date and on-chain transaction will be published in a separate community announcement.
- Throughout the round, each contributed HAI is valued at \$0.002 to determine the participant’s TASTY allocation, regardless of HAI’s market price.

How to participate

1

Prepare your HAI

Hold HAI on the VeChain network in a supported self-custody wallet. Then send the HAI from that wallet to the official round address corresponding to your selected participation option. If you are applying for the stHAI benefit, send the HAI from the hAI wallet associated with your eligible stHAI position.

Do not send HAI directly from an exchange account. Such transactions will not qualify for the round and may not be credited to your allocation.

2

Choose your participation terms and amount

Select one of the three participation options:

- Best Price
- Balanced Entry
- Accelerated Unlock

The minimum participation amount is 12,500 HAI, equivalent to \$25 at the fixed price of \$0.002 per HAI. Carefully review the TASTY price, TGE unlock, cliff, and vesting schedule before choosing an option.

3

Verify the official Round wallet

Verify the wallet address through the official HAI and TastyCo channels. Each participation option has its own VeChain wallet address. Verify that you are using the address corresponding to your selected option.

Official Round wallets	VeChain address
Best Price	0x22996bc754f50a7ffc08183531ad277725a10d1e
Balanced Entry	0x3f9ae3212103b3f1729d9297e747b3c96e16c477
Accelerated Unlock	0x4f693e381e2c922a0ed327f1c9645d4ac522e364

Security warning: Never use a wallet address received through a private message.

4

Send your HAI

Send your chosen participation amount to the official Round wallet using the VeChain network.

Only send HAI. Sending another asset or using another network may result in the permanent loss of funds.

5

Save your transaction hash

Save the transaction hash after your transfer is confirmed. You will need it to register your participation.

6

Submit the confirmation form:

<https://forms.gle/L8YninEMPsprZtu17> ↗

Do not provide a centralized exchange deposit address unless it is explicitly supported.

7

Confirmation

Keep your transaction hash and submitted wallet details until the TASTY distribution is complete.

Choose your participation terms

Participants can choose between three combinations of TASTY price, TGE unlock, cliff, and vesting.

Participation option	HAI per 1 \$TASTY	TGE unlock	Cliff	Vesting
Best Price	8 HAI	5%	6 months	24 months
Balanced Entry	10 HAI	10%	3 months	24 months
Accelerated Unlock	12.5 HAI	20%	No cliff	12 months

The TGE unlock is distributed first. The remaining allocation begins vesting after the applicable cliff and unlocks over the vesting period specified for the selected option: 12 or 24 months.

What is stHAI?

stHAI is a liquid restaking token minted by staking HAI in the hAI App. It is used to determine access and allocation benefits within HAI Rounds. Eligible stHAI holders participating in this round receive 15% additional TASTY based on their purchased allocation.

For example, if a participant purchases an allocation of 10,000 TASTY and qualifies for the stHAI benefit, they receive an additional 1,500 TASTY under the same applicable distribution conditions.

To qualify for the bonus, participants must send their HAI from the hAI wallet associated with their stHAI position. The additional TASTY follows the same TGE unlock, cliff, and vesting schedule as the participant’s selected option

What happens after the round?

- ✓ All contributed HAI will be burned.
 - ✓ The burn transaction will be published in an official community announcement.
 - ✓ Participants will receive the TGE portion specified by their selected participation option.
 - ✓ The remaining allocation will follow the applicable cliff and vesting schedule.
- ✓ Any additional TASTY received through the stHAI benefit will follow the same distribution conditions as the participant’s purchased allocation.
 - ✓ TASTY will be distributed or made claimable on the BNB Chain.
 - ✓ TastyCo will announce the exact distribution and claim process before TGE. Follow TastyCo’s official channels for updates.
